CITY OF PANAMA CITY PARTIAL LIST OF CERTIFIED TESTERS & INSTALLERS FOR BACKFLOW PREVENTION ASSEMBLIES

This list is provided only as a convenience and does not imply an endorsement of the services provided by any of the listed companies. The City of Panama City makes no claim or representation, explicit or implied, regarding the performance of the following service providers. The City of Panama City encourages you to exercise due diligence when hiring any contractor. Please see definitions of the titles at the end of this document to ensure the correct contractor is hired. This list is based on information available at the time and may not include every company offering such service. The vendors are listed alphabetically.

To Testers and Plumbers: To update your on-file credentials, please do so on the Backflow BMP portal. To request to be added to the list, please contact tnguyen@panamacity.gov.

Definitions

Installer: Installers have both been registered as a licensed plumber through the city's permitting software and have reported to Environmental Compliance that they provide installation services for backflow preventers.

Tester: Testers have provided both a certification for training (needs to be completed every 2 years) and a calibration report for their test kit (needs to be completed every year). Ultimately, they have registered with the city's backflow compliance program and can submit test reports. The program automatically blocks testers from entering reports if they have expired credentials.

Repairer: Repairers have completed all the requirements of a tester and have also gone to school and received an additional certificate for repairing backflow prevention assemblies.
